Sensory crossover is a fact of all image perception, but it's particularly pronounced in fashion imagery, which incorporates sensations of touch, movement, and pose.

Results have been encouraging, showing safety and preliminary therapeutic potential for some treatments.

I wish I would have known in advance and been more prepared so that I could have stifled my scream when the scope was inserted.

I'm not trying to assert some kind of a "homosexual agenda," but seriously, I live in New York, and to pretend like this city isn't teeming with gay romances is just plain crazy.
